Ok I'm confused about the paper towels because we only use them in the kitchen not the bathroom. So I hope it's not coming from somewhere else. I appreciate the update.

Hello (b) (6)

I am not really sure at this point. We need to see if it is because of the paper towels and plastic wrappers or if it is something else. The plumber did say that it was flowing but that it is retaining a little water in the line. This typically happens when the line is not sloped perfectly. He indicated that he sees this all the time in this area. I am hoping that it will not happen again but if it does, we may have to re-slope the line. Please keep me updated if you have any additional problems and make sure you notify your landlord. Both you and (b) (6) have my contact information.

Thanks

Yes we have but I don't remember how many times but it was never this bad. Do you think its something else?

Hello (b) (6)

Can you tell me if you guys have had issues with blockages in the past? And if so how often?

Thanks
 Gary Moore

Hello (b) (6)

I wanted to let you know that the Plumber was able to remove the blockage in the sewer line and it appears to be functioning properly at this time. Fortunately, the line was not collapsed. The plumber indicated that the blockage was a result of paper towels, hair pins, some plastic wrappers, rubber bands and hair. Please let your family know to be careful to avoid putting paper towels, plastic wrappers, or other similar items down the toilet or sinks to avoid a similar type blockage.

Thanks,
